

WHAT IS KINDFIND?

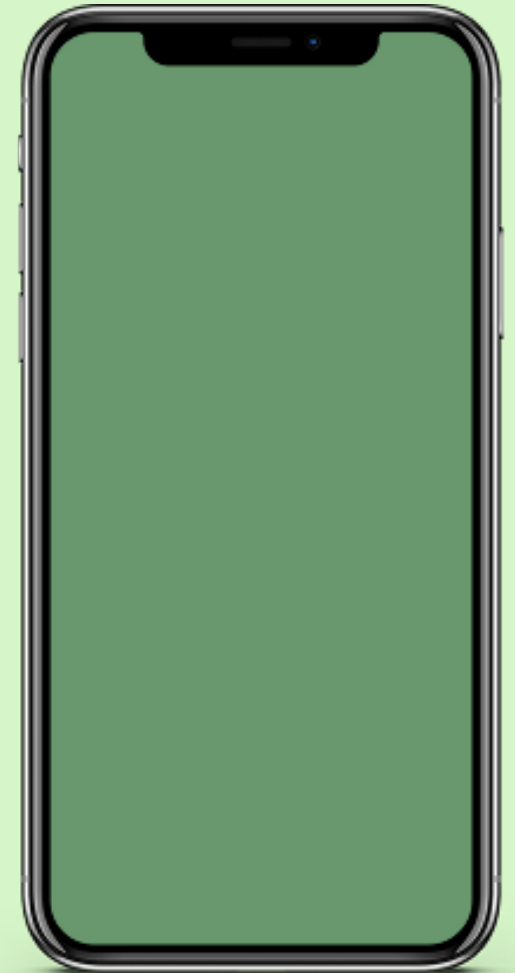

KindFind is a new mobile app designed to help users discover and engage with their local charity shops. We believe strongly in community, affordability and sustainability, and the app helps promote these values by making the world of charity shopping more accessible to people.

Through KindFind, users can discover sustainable fashion and engage in responsible consumption. Knowing what is in charity shops and where you can find items can be stressful, but KindFind helps reduce these worries to make the experience as easy as possible.

HOW DOES IT WORK?

Users are able to create accounts for free, and then see a feed of posts from other users as well as from charity shops. If a user is interested in the item displayed, they can reserve the item for 48 hours so they can go pick it up in person.

COMMUNITY

KindFind is a local, community driven app. Whether you're showing off an item that you've donated to a charity shop, or spot something cool but isn't quite your style, posting on KindFind helps promote items and helps people who need them find them.

By using KindFind you support your community and help charities for a good cause. Try following your favourite charity shop to see what might pop up!

AFFORDABILITY

As the cost of living continues to rise, it can be hard to justify the prices that some shops float. KindFind helps you browse local charity shops for what you need all at an affordable price. You don't need to pay extortionate fees to find something you'll love.

SUSTAINABILITY

Fast Fashion has raged for years, and lots of people buy clothes they'll only wear a handful of times. Why buy in when you can explore the vast options shown on KindFind? Find something you'll love and that you can feel good about, or give something that others might need. Set your own trends and wear your wardrobe to the fullest.
